

# NIGERIA BULK SMS GATEWAY API INTEGRATION GUIDE

JavaScript Guide

Interbound Media

# SMS Gateway API

Are you a developer or bulk SMS reseller? You can interface your application, website or system with our 24/7 reliable messaging gateway by using our very flexible HTTP API connection. Once you are connected, you will be able to deliver SMS messages and check your balance.

## Text Message

--

<https://portal.nigeriabulksms.com/api/?username=user&password=pass&message=test&sender=welcome&mobiles=234803000000,234802000000>

## Example Responses:

Success Response: {"status":"OK","count":1,"price":2}

Failed Response: {"error":"Login denied.,"errno":"103"}

## Other optional Parameter

1. Contacts = The list of contact ids to send the message
2. Groups = The list of group ids to send the message
3. Numbers = The list of number ids to send the message
4. Type = The type (text, call, tts ) of the message
5. Message = Message text or audio reference number
6. Verbose = For option of getting message reference or Id in the message response

**Error Codes:**

NOTE: **Username and Password field** as shown in the above interface should be *deleted or set on hidden* in your application with your username and password on default value of the field.

## Javascript

```
<script>

functionusernameInput() {
returndocument.getElementById("Username").value;
}
var a = usernameInput();
//console.log(a);
//=====
functionpasswordInput() {
returndocument.getElementById("Password").value;
}
var b = passwordInput();
//console.log(b);
//=====
functionmessageInput() {
returndocument.getElementById("Message").value;
}
var c = messageInput();
//console.log(c);
//=====
functionsenderIDInput() {
returndocument.getElementById("SenderID").value;
}
var d = senderIDInput();
//console.log(d);
//=====
functionrecipientInput() {
returndocument.getElementById("Recipient").value;
}
var e = recipientInput();
//console.log(e);

Var url= "https://portal.nigeriabulksms.com/api2/?username="+a+"&password="+b+"&sender=
"+d+"&message="+c+"&mobiles="+e;
var request = new XMLHttpRequest();
request.open('GET', url);
request.onload = function () {
console.log(request.responseText);
}
request.send();
</script>
